⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

INTRODUCTION

This service manual contains technical information which will allow service personnels to understand and service this model.

Section 1 presents you with technical know how for actual servicing and general information of features and controls, enabling you to become familiar with each function.

Section 2 presents to your mechanical and electrical adjustment information as well disassembly and replacement procedures.

In the case of very common information relating to other models like mechanical adjustments, please refer to the appropriate service manual.

Section 3 contains block diagrams which provides you with information for checking and understanding each circuit. Schematic diagrams which give you detailed information such as waveforms, voltage data, function e.t.c. ...

Section 4 contains exploded views and parts list.

Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, this information will be followed by supplementary service manual to be filed with original service manual.

Note 1: Adjustment procedures, Disassembly Procedures and Assembly Procedures for Mechanism Chassis are separate volume from this service manual.

Please refer to the service manual for Z-Mechanism Chassis. (Order No. VRD9802005C2)

Note 2: The Model No. is indicated on the Schematic Diagram and Circuit Board Diagrams as follows.

Model No.	NV-HD630EG/EG-S	NV-HD630B/B-S	NV-HD630BL	NV-HD630EC/EC-S	NV-HD628EG

Caution for AC Mains Lead

For your safety please read the following text carefully

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5 amp fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5 amps and that it is approved by ASTA or BSI to BS 1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic Dealer.

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13 AMP SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral

Brown: Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstance should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol .

How to replace the Fuse

- There are two types of the AC Mains Lead assembly: A and B as shown below.

1 Open the fuse compartment with a screwdriver.

2 Replace the fuse and fuse cover.

TYPE A

TYPE B

1-1-2. CHECKING OF MAIN C.B.A.

When servicing the MAIN C.B.A., take out the MAIN C.B.A. and mechanism from the frame and turn over. And then Extension Cable (VFK2744) between the POWER C.B.A. connector (P1103) and the MAIN C.B.A. connector (P1001) as shown in Fig. S3.

Fig. S3

1-1-3. CYLINDER UNIT REPLACEMENT

A. CYLINDER UNIT REPLACEMENT

- 1) Remove the 3 Screws (A) of the CYLINDER UNIT with a magnetized screw driver.

Fig. S4

B. UPPER CYLINDER DISASSEMBLY

- 1) Remove 2 screws (A).
- 2) Remove the Cylinder Stator Unit.
- 3) Remove 2 screws (B).
- 4) Remove the Cylinder Rotor Unit.
- 5) Loosen hex screw (C) (1.5 mm) and remove the Cylinder Retainer.
- 6) Remove the Upper Cylinder.

Fig. S5

C. UPPER CYLINDER ASSEMBLY

When reassembling, perform the steps in the reverse order.

- 1) Install the Cylinder Retainer so that the 2 holes on top of the Cylinder Retainer are at right angles with the Head Amp Shield.
- 2) Tighten the hex screw (C) (1.5 mm) while pressing down on top of the Cylinder Retainer.

Fig. S6

Fig. S7

- 3) Install the Cylinder Rotor Unit so that the inner hole of the Cylinder Rotor Unit fits to the small projection (D) on top of the Upper Cylinder.
- 4) Tighten 2 screws (B).
- 5) Install the Cylinder Stator Unit so that the rear side of the Cylinder Stator C.B.A. is parallel with the Head Amp Shield.
- 6) Tighten 2 screws (A).
- 7) Confirm the PG SHIFTER ADJUSTMENT with the alignment tape (PAL: VFJ8125H3F/NTSC: VFM8080HQFP) and adjust it if necessary.

Fig. S8

1-1-4. FLAT CARD CABLE INSTLLATION

When installing the Flat Card Cable on the connector, install the Flat Card Cable with the cable contacts facing the connector contacts.

Fig. S9

1-2. SELF-TEST & SERVICE INFORMATION DISPLAY

Refer to the Service Manual for Z Mechanism Chassis.
(Order No.: VRD9802005C2)

1-3. CAUTION DURING AUTO TUNING

PROCEDURE

Auto Tuning will start by the following procedure.

1. Connect the DIN-RF Cable.
2. Connect the AC Mains Lead.
3. Turn on the VCR.

Auto Tuning will start.

Auto Tuning searches for TV stations from VHF minimum to UHF maximum and memorizes every tuned program position. Other program positions are skipped.

Auto Tuning takes seven or more minutes to complete its search.

Do not touch the VCR during Auto Tuning.

Auto Tuning will stop halfway, if the VCR is operated or the aerial lead and/or the mains lead are disconnected.

In case of the VCR stopped during Auto Tuning, the VCR have to be reset and restarted. See the following item 2.

NOTE:

1. If the VCR is turned on with the antenna not connected, all channels are skipped. Therefore, firmly connect the antenna and then turn the VCR off and on again to execute Auto Tuning.

2. When Auto Tuning is canceled halfway, Auto Tuning is not executed even if the VCR is turned off and then turned on again.

In this case, Auto Tuning have to be restarted by the following procedure.

- 1) Press EJECT and remove the video cassette.
- 2) Keep \wedge and \vee (CH UP/DOWN) on the VCR pressed simultaneously for 3 seconds or more during the VCR on.
The channel displayed on the VCR display disappears for a moment then changes to 1.
- 3) Turn off the VCR and then turn it on.
Auto Tuning commences.
3. If turning the VCR off during Auto Tuning, Auto Tuning will stop halfway.
The VCR should be reset and restarted by the item 2 in order to execute Auto Tuning.
4. If the VCR starts playback during Auto Tuning, Auto Tuning will stop halfway.
The VCR should be reset and restarted by the item 2 in order to execute Auto Tuning.
5. To cancel Auto Tuning Mid-operation, press POWER key during Auto Tuning (The VCR is turned off).
6. When the VCR is moved to the other area or country, TV broadcasts should be stored again.

1-4. REMOVAL OF CASSETTE TAPE

There are 2 ways to remove a cassette tape.

1. Service Information Display Operation

- 1) Press FF and EJECT keys simultaneously for 3 seconds and set the Service Mode 7.
- 2) Press STOP key in order to rotate the Loading Motor for unloading operation.
(Pay an attention of tape slack)

2. Manual Operation

- 1) Disconnect the AC Mains Lead and remove the Top Panel.
- 2) Rotate the Main Cam Gear clockwise until the Loading Posts move to fully unloaded position as shown in Fig.S10. (Tape is remaining)

Fig. S10

- 3) Rotate the Capstan Motor clockwise from the bottom side to take up the tape.

Fig. S11

- 4) Rotate the Main Cam Gear clockwise until the cassette tape is ejected.

Infra-red Remote Controller

VCR OPERATION

1 AV LINK

To select the VCR mode or TV mode for AV LINK.

2 AUDIO OUT

To select the desired sound mode.

At the every push of this button, the audio output mode changes as follows.

→ Stereo → Left → Right → Normal audio track

The Left (L) and Right (R) Indicators shown which sound mode is selected in the following way.

Stereo: Both the L and R Indicators appear.

Left: The L Indicator appears.

Right: The R Indicator appears.

Normal: Both the L and R Indicators don't appear.

3 OSD/DISPLAY

When this button is pressed for the first time, it makes the On Screen Display appear on the TV screen. From the second time, it changes the VCR display indication as follows:

→ Clock → Counter → Remaining Tape Time

4 OFF+, OK

For the Child Lock function.

See the description of page 8.

5 Numeric Buttons

Be sure that the VCR/TV switch is set to VCR.

• To select the programme positions (1-99) of the VCR.

9: (9)

19: (1) → (1) → (9)

• To enter a ShowView number.

6 INPUT SELECT

To select the A1 or A2 external recording source.

• Be sure that the VCR/TV switch is set to VCR.

7 SEARCH

To search for a recorded programme using the intro-jet scan and the programme list search functions after timer recording.

8 PAUSE/SLOW

During playback:

- When pressed once: Still picture. "00" is lit.
- When pressed for 2 seconds or more:

Slow playback. "0>" is lit.

During recording: To pause recording.

9 INDEX

For the index search function.

10 REC

To start a recording.

11 VCR/TV switch

VCR: To select the VCR operation mode.

TV: To select the TV operation mode.

12 SHOW VIEW

For the ShowView programming.

- Be sure that the VCR/TV switch is set to VCR.

13 On Screen Display Menu Operation Buttons

The buttons with the green characters are used for the on screen display menu operation.

MENU: To make the On Screen Display Main menu appear on the TV screen.

EXIT: To exit the menu.

OK: To confirm the selection, or to store.

▲ ▼ ◀ ▶: To make selections from the On Screen Display. (When the On Screen Display is displayed.)

These buttons can also be used for the playback, stop, rewind and fast forward mode. (When the On Screen Display is not displayed.)

14 RESET

To reset the tape counter (elapsed time) to "0:00.00".

- The tape counter is automatically reset to "0:00.00" when a video cassette is inserted.

15 Timer Recording Operation Buttons

✓ ^, DATE, ON, OFF:

To programme a timer recording.

PROG/CHECK: To programme a timer recording.

To check and modify timer programmes.

- Be sure that the VCR/TV switch is set to VCR.

CANCEL: To cancel timer programmes.

To set the VPS/PDC recording option or cancel the option.

SP/LP: To select the tape speed desired for recording.

SP gives the best picture quality.

LP gives the longest recording time.

TIMER REC: To turn the timer recording function on and off. **[■]** is lit when the function is on (standby mode).

Once the operating timer recording function is set, normal VCR operation is not possible unless this button is set to off.

16 Infra-red Transmitter

Child Lock function

Holding down OFF+ and OK until "▷" and "hold" appear in the VCR display will deactivate all buttons. Any external commands will not be processed by the VCR.

To cancel this function, repeat the same procedure until "▷" and "hold" disappear.

- Be sure that the VCR/TV switch is set to VCR.
- If a button is pressed while the Child Lock function is on, "▷" and "hold" appears in the VCR display.
- When the power is disconnected, the Child Lock function is automatically cancelled after the roughly 60 minutes of backup time.

TV OPERATION

17 Numeric Buttons

To select programme positions (1-99) of the TV. These buttons are also used to select the Teletext screen.

- Be sure that the VCR/TV switch is set to TV.

18 AV

To switch between TV channels and external input channels. See page 10.

- Be sure that the VCR/TV switch is set to TV.

Remote Controller Setup

19 POWER

Press to switch the TV from on to standby mode or vice versa. In standby mode, the TV is still connected to the mains.

- Be sure that the VCR/TV switch is set to **TV**.
- With some TV models, it may only be possible to switch the TV to the standby mode using this button. In this case, use the numeric buttons, **AV** or **▼ ▲** to switch the TV on.

20

To adjust the volume of the TV.

21 **▼ ▲**,

To select the required programme position (TV station) of the TV.

These buttons are also used to select the Teletext screen.

- Be sure that the VCR/TV switch is set to **TV**.

22 TV/TEXT

To switch between normal TV mode and Teletext mode.

- Be sure that the VCR/TV switch is set to **TV**.

23 **▼** (red), **DATE**—(green), **ON**—(yellow), **OFF**—(blue)

These buttons are used in Teletext mode. Change the screen according to each colour display (red, green, yellow, blue).

- Be sure that the VCR/TV switch is set to **TV**.

Installing the Batteries

- 1 To remove the cover, slide it in the direction of the arrow while pressing down.

- 2 Load the batteries with their polarity (+ and -) aligned correctly.

- 3 Slide the cover back on.

Power Source for the Remote Controller

The remote controller is powered by 2 AA, UM3 or R6 size batteries. The life of the batteries is about one year, although this depends on the frequency of use.

Precautions for Battery Replacement

- Load the new batteries with their polarity (+ and -) aligned correctly.
- Do not apply heat to the batteries, or an internal short-circuit may occur.
- If you do not intend to use the remote controller for a long period of time, remove the batteries and store them in a cool, dry place.
- Remove spent batteries immediately and dispose of them.
- Do not use an old and a new battery together, and never use an alkaline battery with a manganese battery.

Using for Operation of your TV

Only Panasonic televisions can be operated with the provided remote controller.

The settings for operating the TV with the remote controller have already been made.
No additional settings need to be performed.

Note:

Some Panasonic televisions cannot be operated using this remote controller.

Switching Between External Input Channels of Your TV

Panasonic TVs have three different methods for switching between the external input channels.

- Be sure that the VCR/TV switch is set to **TV**.

Press **AV** to switch to the external input channels.
A1 or **A2** \longleftrightarrow TV channels

- 1 Press **AV**.

- Colour bars for selecting the external input channel appear on one corner of the TV screen.

- 2 Select the desired external input channel by pressing the corresponding colour button **▼** (red), **DATE**—(green), **ON**—(yellow) or **OFF**—(blue) on the remote controller, following the instructions on the TV screen.

- 1 Press **AV**.

- The previously-selected external input channel screen appears on the TV, and a screen for selecting another VCR input channel is also displayed.

- 2 Press **▼** () **▲** () at the same time to select the desired channel.

- Each time **▼** () **▲** () is pressed simultaneously, the channel selection scrolls up.
- The screen for selecting the channel will turn off after a few seconds.

Connections and Settings Without Using a 21-Pin Scart Cable

1 Connections

The VCR sends signals to the TV via an RF coaxial cable (supplied).

Make the connections shown in the figure below.

2 Settings

Setting a VCR channel on your TV allows you to view the video picture on your TV in the same way that you watch TV broadcasts.

Once the Country setting is completed, the VCR automatically searches for TV stations and sets the clock. (This is known as Auto Setup.)

Preparation

Turn on the TV and VCR.

2

Set the TV to an unused position which you wish to use for your video playback.

- Tune the TV until the test pattern appears on the screen. Consult the instruction manual of your TV to find out how to tune it.
- The initial setting of the RF output channel is 36ch.

(Test Pattern)

3

Press OK to exit the Test Pattern screen. The Country setting screen appears.

Country	
Belgique	Deutschland
Bulgare	Oesterreich
Belgien	Portugal
Danmark	Suomi
Espana	Svedia
France	Schweiz
Italia	Suisse
Nederland	Swizzera
Norge	others

4

Select the desired country. Auto Setup (auto tuning and auto clock settings) then starts automatically.

To Reset Auto Setup:

Press EXIT, then disconnect and connect the power source. The Country setting screen will appear on the screen. Repeat the operations from step 3.

Operations

- 1 Keep MENU pressed for 5 seconds or more.

- Hold down the button until "Ch" appears in the VCR display.

- The Auto setup searches for TV stations from VHF minimum to UHF maximum and stores the data for every programme position. The other programme positions are skipped.
- The Auto setup takes five minutes or more to search for the TV stations and set the clock.
- If VCR is not set correctly by Auto setup, see Various Settings on pages 31-34.
- Auto clock setting will not work correctly if teletext information is not available. If the clock setting screen appears after auto tuning has been completed, set the clock manually. Refer to steps 3-5 on page 34.

To Check the Settings for Auto Setup:
Use the following procedure to check that the settings for Auto Setup are set correctly.

Operations

- 1 Press MENU and select Tuning.

- 2 Select Manual.

- 3 Looking at the On Screen Display, check that the settings for Auto Setup are set correctly.
If the desired TV stations have all been displayed and are set in the correct order, Auto Setup is completed.
If the TV stations have not been correctly entered and set, perform the manual setting procedure on page 31.
Press EXIT to exit the On Screen Display.

Note:

Manual tuning is required when there is a * mark at the beginning of the station name display, even if the station name is displayed. See page 32.

To Change the RF Output Channel (using the remote controller):

In some rare cases after Auto Setup, interference may be visible on the picture. To avoid interference, you can manually adjust the RF output channel a few steps up or down from the current setting.

Operations

- 1 Turn on the TV and VCR.
- 2 Keep MENU pressed for 5 seconds or more.
Hold down the button until "Ch" appears in the VCR display.
- 3 Enter the desired channel number (21-69) by using the numeric buttons or $\swarrow \searrow$ of the remote controller.
 - Be sure that the VCR/TV switch is set to VCR.
 - Set the RF output channel of the VCR to "—" (RF OFF) when the VCR is connected to the TV via the 21-pin scart cable.

Press the "0" numeric button or $\swarrow \searrow$ to display "—".

- 4 Press OK to finish the setting mode.
 - Return your TV to the new channel for the VCR.
 - After the Country setting is set, the Country setting screen will not be displayed even if the RF output channel is changed and OK is pressed.

Connections and Settings Using a 21-Pin Scart Cable

I Connections

The VCR sends signals to the TV via a 21-pin scart cable (sold separately).

When connecting the VCR to a TV with the "Q Link", "DATA LOGIC", "NEXTVIEWLINK", "Easy Link", "Megalogic", "SMARTLINK", or other logo, the fully-wired 21-pin scart cable should be used in Step 3. If this cable is not used, the "Preset Download" and "Direct TV REC" functions will not operate. (See pages 18 and 23.)

Make the connections shown in the figure below.

After making these connections, one of two settings methods is performed.

- If the VCR is connected to a TV with the "Q Link", "DATA LOGIC", "NEXTVIEWLINK", "Easy Link", "Megalogic", "SMARTLINK", or other logo using a fully-wired 21-pin scart cable, then go to page 18.
- For other connections, go to page 16.

Note:

Set the RF output channel of the VCR to "—" (RF OFF) when the VCR is connected to the TV via the 21-pin scart cable. See page 13.

Connection to a Decoder

In addition to the connections described on the previous page, connect the AV2 socket to the decoder using a 21-pin scart cable.

Notes:

- If the TV set is provided with an RGB-compatible connector, connect the 21-pin AV cable from the VCR to this connector. Use the fully-wired 21-pin scart cable for connecting the TV set and VCR and for connecting the VCR and decoder.
- Set the RF output channel of the VCR to "—" (RF OFF) when the VCR is connected to the TV via the 21-pin scart cable. See the bottom section on page 13.
- AV2** must first be set to **DECODER** when the decoder is connected to the AV2 socket. (See page 38.)

AV LINK

With this button, the connected colour TV set can be switched from TV mode to VCR mode (and vice versa) when it is connected by means of 21-pin scart cable. This makes a variety of functions possible, such as simultaneous recording and viewing when a Pay TV decoder or a satellite receiver has been connected.

VCR mode (VCR indicator lights up):

To enjoy sound and pictures from the VCR.

- When MENU is pressed and the OSD (On Screen Display) screen is displayed, the unit also automatically switches to VCR mode.
- However, if the unit is originally in TV mode, the VCR indicator is not displayed.
- The unit also automatically switches to VCR mode when playback is started. However, the unit cannot be returned to TV mode during playback.

	VCR	TV set
Power On	VCR mode TV mode	AV input selected Input from TV set's tuner*
Power Off	—	Input from TV set's tuner

*When the VCR is set to the TV mode and the Pay TV channel is selected, the signals will still be scrambled even when Pay TV is selected by the TV set's tuner. In this case, either set the VCR to the VCR mode or switch the TV set's input signals to AV input.

2 Settings

Auto Setup

This setting is used when the VCR is not connected to a TV with the "Q Link", "DATA LOGIC", "NEXTVIEWLINK", "Easy Link", "Megalogic", "SMARTLINK", or other logo using a fully-wired 21-pin scart cable. The VCR automatically searches for TV stations and sets the clock. (This is known as Auto Setup.)

Preparation

Turn on the TV and VCR.

Notes:

- The Auto setup searches for TV stations from VHF minimum to UHF maximum and stores the data for every programme position. The other programme positions are skipped.
- The Auto setup takes five minutes or more to search for TV stations and set the clock.
- If VCR is not set correctly by Auto setup, see Various Settings on pages 31-34.
- Auto clock setting will not work correctly if teletext information is not available. If the clock setting screen appears after auto tuning has been completed, set the clock manually. Refer to steps 3-5 on page 34.

To Check the Settings for Auto Setup:

Use the following procedure to check that the settings for Auto Setup have been correctly made.

Operations

- Press MENU and select Tuning.

Main menu	Manual
Display	.../.../...
Tuning	.../.../...
Clock	.../.../...
Functions	.../.../...
Language	.../.../...
Country	.../.../...

- Select Manual.

The **Country** setting screen appears.
Select the desired country.

- Auto Setup (Auto tuning and Auto clock setting) starts automatically.

To Reset Auto Setup:
Press EXIT, then disconnect and connect the power source. The **Country** setting screen will appear on the screen.

Station	Pos. Name	Ch	Pos. Name	Ch
1 ARD	1	11 ORB	35	
2 ZDF	2	12 RTL+	4	
3 SWR3	3	13 SAT+	5	
4 HR3	20	
5 BR3	16	
6 RB3	3	16	
7 F3	33	17	
8 SW3	39	18	
9 WDR3	17	19	
10 MD3	32	20	

- Looking at the On Screen Display, check that the settings for Auto Setup are set correctly. If the desired TV stations have all been displayed and are set in the correct order, Auto Setup is completed. If the TV stations have not been correctly entered and set, perform the manual setting procedure on page 31. Press EXIT to exit the On Screen Display.

Note:

Manual tuning is required when there is a * mark at the beginning of the station name display, even if the station name is displayed. See page 32.

The "Q Link" functions

When the VCR is connected to a TV with the "Q Link", "DATA LOGIC", "NEXTVIEWLINK", "Easy Link", "Megalogic", "SMARTLINK", or other logo using a fully-wired 21-pin scart cable, you can use the "Q Link" functions.

The following Q Link functions are available.

1 Preset Download

When the VCR is connected to the TV, the station list data will be copied from the TV to the VCR, and the TV channels will be preset on the VCR.

See page 18.

2 Direct TV REC

This function allows you to immediately record the program you are watching on the TV at the moment by simply pressing DIRECT TV REC.

See page 23.

3 TV/VCR Auto Power On

(This function is only available when the VCR is connected to a TV with the "Q Link" or "DATA LOGIC" logo.) Even if the TV or VCR is in the standby mode, the TV and VCR will automatically turn on when one of the buttons [**[> (PLAY)**, SHOW VIEW, PROG./CHECK or MENU] is pressed.

- When a tape with a broken erasure prevention tab is inserted into the VCR, the VCR starts up and automatically begins playback. The TV also turns on.

4 VCR Auto Power Off

(This function is only available when the VCR is connected to a TV with the "Q Link" or "DATA LOGIC" logo.) Turning the TV off will also turn the VCR off.

However, this operation works only when the VCR has been set to Rewind or Stop mode, or there is no tape inside.

- If the Power Off command is received while the VCR is rewinding the tape, the VCR will not turn off until rewinding is completed.
- This operation does not work when settings are being made. (Download, Auto Setup, Auto Clock Setting, Manual Search)

5 TV On Screen Display Message

(This function is only available when the VCR is connected to a TV with the "Q Link" or "DATA LOGIC" logo.) With this function, VCR messages appear on the TV screen even in the TV mode.

Message Conditions when message appears

This programme	Timer recording is starting. has already started
----------------	---

Note:

Depending on the TV, the message may not appear correctly.

Preset Download

This setting is used when the VCR is connected to a TV with the "Q Link", "DATA LOGIC", "NEXTVIEWLINK", "Easy Link", "Megalogic", "SMARTLINK", or other logo using a fully-wired 21-pin scart cable.

Select the desired country.

On Screen Display

Country	
België	Deutschland
Belgian	Oesterreich
Belgien	Portugal
Danmark	Spanien
Espana	Sverige
France	Schweiz
Italia	Suisse
Nederland	Sweden
Norge	others

If the VCR is connected to a TV with the "Q Link" or "DATA LOGIC" logo, then the Country setting screen does not appear and download begins immediately.

- When Downloading has finished, the lowest channel at which a broadcast can be tuned in is received.

Notes:

- Download will only work when the VCR is connected to a TV with the "Q Link", "DATA LOGIC", "NEXTVIEWLINK", "Easy Link", "Megalogic", "SMARTLINK", or other logo using a fully-wired 21-pin scart cable. When this condition is not met, Auto Setup will be executed. (See page 16.)
- When Preset Download (Download from TV) has been executed, do not perform Manual Tuning described hereafter on page 31. This is because when the tuning contents for the TV are changed, this information is downloaded to the VCR again, possibly erasing the independent contents input by Manual Tuning.

Playback

- Operations**
- Display Symbols**
- 1 Insert a recorded cassette tape.
 - 2 Press ▶ (PLAY) to start playback.
 - 3 Tap ▶▶ (FAST FORWARD) to search forward.
• Press ▶ (PLAY) to change back to normal playback.
 - 4 Tap ◀◀ (REWIND) to search backward.
• Press ▶ (PLAY) to change back to normal playback.
 - 5 Press PAUSE/SLOW to view a still picture.
• Press ▶ (PLAY) or PAUSE/SLOW to continue normal playback.
 - 6 Keep PAUSE/SLOW pressed for 2 seconds or more to view a slow motion picture.
• Press ▶ (PLAY) to continue normal playback.
 - 7 Press □ (STOP) to stop the picture.

Note:

If you keep ▶▶ (FAST FORWARD) or ◀◀ (REWIND) pressed in step 3 or 4, search playback is activated while the button is pressed, and operation returns to normal playback when the button is released.

1 Cassette slot
2 Control dial
3 Display window
4 Headphones jack
5 Volume control
6 Power switch
7 Headphone jack

Other Playback Functions

To View the Video during Fast Forward or Rewind

Keep ▶▶ (FAST FORWARD) pressed during fast forward. Keep ◀◀ (REWIND) pressed during rewind.

To Play Back the Recorded Part Repeatedly

Keep ▶ (PLAY) pressed for 5 seconds or more. "R" appears on the On Screen display.

Press □ (STOP) to cancel from Repeat Playback mode.

To Eject the Video Cassette Using the Remote Controller

Keep pressing □ (STOP) for at least 3 seconds.

NTSC Playback (NV-HD630EG/EC only)

Tapes recorded in the NTSC system can be played back with this VCR via a PAL system TV set.

- The playback picture may roll up or down. If the TV set is equipped with a V-HOLD control, it may be possible to stop the picture movement by adjusting this control.
- Depending on the TV set used, the picture may be in black and white. However, this is not a malfunction.

Manual Tracking Adjustment / Vertical Locking Adjustment

Be sure that the VCR/TV switch is set to VCR.

For the tracking adjustment and vertical locking adjustment

- For manual tracking adjustment
The ▼ (-) and ▲ (+) buttons are used to adjust the tracking when, for example, noise bars on the picture during normal playback are better removed manually than by automatic digital tracking control. Press both buttons down at the same time to return to automatic digital tracking control.
- For slow tracking adjustment
When noise bars appear during still or slow playback, switch over to slow playback and adjust with the ▼ (-) or ▲ (+) button to reduce the noise bars.
- For vertical locking adjustment
Use the ▼ (-) and ▲ (+) buttons to minimize any vertical jitter during still picture playback.

Automatic Playback

When a cassette without an erasure prevention tab is inserted, the VCR starts playback automatically.

Automatic Rewinding

When the tape reaches the end during recording (except for timer recording) or playback, it will automatically be rewound to the beginning.

- During OTR, this function will not work.

Notes:

- Audio reproduction of linear (conventionally recorded) tapes will be monaural when played back on the FM Hi-Fi video recorders.
- Cue, review or slow playback will be automatically cancelled after 10 minutes, and still playback after 5 minutes.
- In LP mode only:
 - 1. During any playback mode other than normal playback, the picture may have some noise bars, the colour may be unstable, or a black and white picture may appear.
 - 2. When playing back a tape which was recorded on another VCR, it may be necessary to adjust the Tracking Control. In some cases the picture quality may still be inferior. This is due to limitation of format.
 - 3. Depending on the TV set used, the playback picture may roll up or down during special playback (Pause, Cue, Review or Slow playback mode). However, this is not an indication of a malfunction.

Manual Recording

1—13

Operations

Display Symbols

- 1** Insert a video cassette with an intact erasure prevention tab.
 • If it has already been inserted, press POWER (P/I) to turn the VCR on.

- 2** Select the TV station using the and buttons.
 • It is also possible to select by pressing the numeric buttons.
 • Be sure that the VCR/TV switch is set to VCR.

- 3** Press REC (REC/OTR) to start recording.

- 4** Press (STOP) to stop recording.

- To select the Desired Tape Speed**
 Press SP/LP before recording.

SP

- To pause Recording**
 Press PAUSE/SLOW during recording.
 Press again to continue recording.

- To Record One TV Programme while Viewing Another Programme**

After step 3, change to the TV channel of the programme you want to view.

Recording of Stereo and Bilingual Programmes

- 1 Recording is automatically made in the stereo or bilingual mode. This prevents errors in the selection of the dubbed or the original language.
- 2 During playback press AUDIO OUT to select the desired sound mode. See page 7.

Notes:

- When a video cassette with a broken-off tab is inserted, the indication will flash to indicate that recording is not possible.
- The recording pause mode will be automatically cancelled after 5 minutes and return to the stop mode.

The NICAM Broadcast System (NV-HD630EC only)

NV-HD630EC is equipped with the NICAM sound system also.

NICAM is a 2 Channel sound broadcast system to provide either a high quality stereo sound track or 2 independent MONO sound tracks, M1 and M2.

NICAM programmes are always accompanied by standard sound broadcasts and you can select the desired sound with AUDIO OUT during playback.

- The NICAM digital stereo sound can only be recorded on the Hi-Fi audio track.
- To record the regular sound (ordinary normal sound) on the FM audio tracks when a Stereo, Bilingual or NICAM programme is received, select Mono ON during manual tuning procedure. See page 32.

To display the Approximate Remaining Tape Time

- 1 Select Tape length from the On Screen Display and select the corresponding cassette tape length. See page 38.

◀ E-180: For E30, -60, -90, -120 and -180 tapes.

E-195: For E195 tape.

E-240: For E240 tape.

E-260 ▶: For E260 and -300 tapes.

- 2 Press OSD/DISPLAY repeatedly until the Remaining Tape Time appears on the VCR display.

→ Clock → Counter → Remaining Tape Time

- The remaining tape time may not be displayed correctly for some tapes.

Important Note for the NICAM System

When NV-HD630EC is switched on, the tuner will automatically switch to a NICAM broadcast, if NICAM is being transmitted. During test transmissions, it is possible that the sound received doesn't correspond to the picture being viewed. In order to receive a synchronized sound and picture, select monaural sound with AUDIO OUT or Mono ON setting. This will only apply until NICAM transmissions are fully operational.

Even if the sound track is in MONO, the stereo indicator will appear.

One-Touch Recording (OTR)

This function only works using the REC/OTR button on the VCR main unit.

After you start recording, you can use this function to stop recording automatically when the programme is finished (useful for recording when you are out). Simply set the recording duration by pressing REC/OTR repeatedly. The duration indicated on the VCR display changes by pressing REC/OTR as follows:

Preparation

Insert a video cassette with an intact erasure prevention tab.

Operations

- 1 Ready the video source which is to be recorded, and start recording.
- 2 Press REC/OTR repeatedly to select the desired recording duration.
 - The VCR will automatically switch off when OTR is completed. To turn the VCR on again, press POWER (O/I).

Notes:

- The OTR function works during normal recording or Direct TV REC.
- When the tape reaches the end during OTR, the VCR will turn itself off.
- To stop OTR at any time, press □ (STOP) or POWER (O/I).

Direct TV REC

This function allows you to immediately record the program you are watching on the TV at the moment by simply pressing DIRECT TV REC.

However, this function works only when this VCR is connected to a TV with the "Q Link", "DATA LOGIC", "NEXTVIEWLINK", "Easy Link", "Megalogic", "SMARTLINK", or other logo using the fully-wired 21-pin scart cable.

Preparation

Insert a video cassette with an intact erasure prevention tab.

Operation

When you are watching TV and you want to record the programme immediately, press DIRECT TV REC. The recording will start.

- It is not necessary to adjust the programme position of your VCR to the TV station that you are watching now.

Notes:

- Even if the programme positions are not the same, the programme position of the VCR switches to the same position of the TV. When recording is finished, the programme position of the VCR returns to the previous position.
- Do not press AV LINK during Direct TV REC. Recording may not be performed normally.
- In some cases, it may not be possible to change the TV channel during Direct TV REC.
- Check beforehand whether the tape may be used for recording.

Timer Recording

Timer Recording

This function allows you to record programmes automatically.

There are two ways to record programmes: ShowView programming, where you enter the ShowView number, and On Screen Display recording, where you enter the recording information yourself while viewing the On Screen Display.

- The ShowView number that you entered also appears on the VCR display.
- If you have entered the wrong ShowView number, repeat step 1 with the correct ShowView number.

2

Press OK.

Using On Screen Display

Up to 8 timer programmes can be recorded up to one month in advance by setting the timer, including weekly and daily programmes.

Preparations

- Insert a video cassette with an intact erasure prevention tab.
- Confirm that the TV is on and the VCR viewing channel is selected.

For Example:

Programme position (channel): 2
Date: 27th October
Starting time: 20:00
Ending time: 21:30
(Present date: 16th October)

Follow the on screen operation guide.

Operations

1 Press PROG./CHECK.

- Be sure that the VCR/TV switch is set to VCR.

Timer recording								
Pos	Name	DATE	Start	Stop	SP	P	VPS	Min
ZDF								
ZDF								
ZDF								

2 Set the programme position (channel) to "2".

- As an alternative method, after pressing $\wedge \vee \blacktriangleleft \blacktriangleright$, you can use $\blacktriangleleft \blacktriangleright$.

Timer recording								
Pos	Name	DATE	Start	Stop	SP	P	VPS	Min
ZDF								
ZDF								
ZDF								

- Set the date to "27/10".
- Set the starting time to "20:00".
 - When it is kept pressed, the indication changes in 30-minute intervals.
- Set the ending time to "21:30".
- Select the desired Tape speed (SP/LP).
- Set VPS/PDC to ON or OFF (---).
 - See page 27 for VPS/PDC recording.
- Press OK for confirmation.
- Press TIMER REC to activate timer recording.
 - When the On Screen Display for programming timer recording turns off, the recording information is automatically sorted in the order of recording start times.
 - Check that \square is lit on the VCR display. If it is flashing, check the timer recording details again. (See page 26.)

Note:

To cancel from the standby mode, press TIMER REC.

Checking a Timer Programme

Confirm that the TV is on and the VCR viewing channel is selected.

- Press PROG./CHECK.
 - Be sure that the VCR/TV switch is set to VCR.
 - The On Screen Display may be distorted in the VPS/PDC recording standby mode.

- Press PROG./CHECK or EXIT to exit the On Screen Display.

Timer recording								
Pos	Name	DATE	Start	Stop	SP	P	VPS	Min
ZDF		27/10	20:00	21:30	SP	ON	90	
ZDF		30/10	19:00	20:30	LP	ON	60	
ZDF		30/10	19:30	20:00	SP	ON	60	
ZDF		10/11	17:30	18:00	LP	ON	30	

Modifying a Timer Programme

- During timer recording, this operation will not work.
- Confirm that the TV is on and the VCR viewing channel is selected.

- Press PROG./CHECK.
 - Be sure that the VCR/TV switch is set to VCR.

- Select the desired timer programme.

- Modify the programme, following the method described in steps 2-7 on page 25.

- Press OK.

- Press PROG./CHECK or EXIT to exit the On Screen Display.

Timer recording								
Pos	Name	DATE	Start	Stop	SP	P	VPS	Min
ZDF		27/10	20:00	21:30	SP	ON	90	
ZDF		30/10	19:00	20:30	LP	ON	60	
ZDF		30/10	19:30	20:00	SP	ON	60	
ZDF		10/11	17:30	18:00	LP	ON	30	

Cancelling a Timer Programme

- During timer recording, this operation will not work.
- Confirm that the TV is on and the VCR viewing channel is selected.

- Press PROG./CHECK.
 - Be sure that the VCR/TV switch is set to VCR.

- Select the desired timer programme.

- Press CANCEL.

- Press PROG./CHECK or EXIT to exit the On Screen Display.

Timer recording								
Pos	Name	DATE	Start	Stop	SP	P	VPS	Min
ZDF		27/10	20:00	21:30	SP	ON	90	
ZDF		30/10	19:00	20:30	LP	ON	60	
ZDF		30/10	19:30	20:00	SP	ON	60	
ZDF		10/11	17:30	18:00	LP	ON	30	

Timer Recording from External Signal Source

If Timer Recording is performed by a unit connected to AV1 (TV) or AV2(DECODER/EXT), select A1 or A2 for the programme position.

A1: Through the AV1 (TV) socket.

A2: Through the AV2 (DECODER/EXT) socket.

- It is also possible to select by pressing INPUT SELECT. Be sure that the VCR/TV switch is set to VCR.

Setting other Programmes

Repeat steps 2-8.

Notes:

- If timer recording does not reach the end (due to insufficient tape or cancellation by the user), the programmed timer recording data will be erased from the memory by 4 a.m. the next day.
- Either the position number or the station name is displayed here.

- For daily and weekly timer recording, the recording time for only one recording session is displayed.

Checking the remaining tape time

- This displays the remaining time for the inserted tape.

Remaining time indicator

- This indicator is not displayed unless the remaining tape time has already been indicated on the VCR display. Refer to page 22.

VPS (Video Programme System)/PDC (Programme Delivery Control)

The Video Programme System (VPS) or the Programme Delivery Control (PDC) is a very convenient system which assures that the TV programmes you have programmed for timer recording will be recorded exactly from beginning to end, even if the actual broadcasting time differs from the scheduled time due to delayed start or extension of the programme duration. Also, if a programme is interrupted and, for example, some special news is inserted, the recording will also be interrupted automatically and resumed when the programme continues.

Depending on the signals sent from the broadcasting stations, the VPS/PDC system may not operate properly even when VPS/PDC has been set to ON. Please check with the broadcasters in your area for details.

- In the case of VPS/PDC recording, use the correct time (VPS/PDC time) for recording the TV programmes. Set VPS/PDC to OFF when the recording time is not the correct time (VPS/PDC time).

VPS/PDC recording is not performed when the time (VPS/PDC time) is incorrect, even if only by one minute. To find out the correct time (VPS/PDC time), consult Teletext, a newspaper or magazine, or other source.

- If the actual broadcasting times of timer recordings overlap (regardless of whether they are VPS/PDC controlled), the recording that starts first always has priority, and the recording of the later beginning programme will start only after the first timer recording has finished.
- When the VPS/PDC signal drops out because the broadcast signal is weak, or when a broadcasting station does not transmit a regular VPS/PDC signal, the timer recording will be performed in the normal mode (without VPS/PDC) even if it was programmed for VPS/PDC. In this case, even if the timer recording is performed, whatever has been programmed will not be cancelled at that particular time but at 4 a.m. on the following day.
- The start times of scheduled programmes listed in the newspaper or magazine may be changed at a later date. Set VPS/PDC to OFF when programming a programme whose start time has been subsequently changed. Particular care must be taken in this respect with ShowView programming since VPS/PDC is automatically set to ON in some countries.
- If a programme listed in a newspaper or magazine has two ShowView numbers, use the ShowView number for VPS/PDC if you wish to proceed with VPS/PDC recording using ShowView programming.
- The default settings for VPS/PDC differ depending on the country concerned. Refer to the table below.

Programming method	ShowView programming	Changes in ShowView programming start time	Non-ShowView programming
Selected Country			
France, Belgium, Netherlands, Sweden, Denmark, Finland, Norway	ON	OFF	OFF
Germany, Switzerland, Austria, Other Countries	ON	ON	ON
Italy, Spain, Portugal	OFF	OFF	OFF

- “---” appears for the VPS/PDC item at the outset if the broadcasting station is not transmitting VPS/PDC signals.

Search Functions

Searching while checking the video cassette contents (Intro-Jet Scan)

The approximate beginning of each recorded programme is played in succession at high speed so that the programme to be viewed can be located easily.

Preparations

- Confirm that the TV is on and the VCR viewing channel is selected.
- Load the pre-recorded video cassette.

1 Press SEARCH.

(This operation is performed while the VCR is OFF or while the VCR is on in stop mode or normal playback mode.)

On Screen Display

- The tape is rewound to the start and played for about 10 seconds at high speed. The VCR is then fast forwarded. At each index signal, the VCR starts forward search for 10 seconds and then repeats fast forward to the next index signal.

- After finding the specific recorded segment, playback starts automatically.
- For the reverse direction, press INDEX \leftrightarrow .
- Up to 20 index signals can be searched for in either direction.
- When the opposite INDEX is pressed, the number shall be decreased until 1 is reached.
- The figure on the display is reduced by 1 each time an index signal is located.
- The INDEX search function can only work correctly if the index signals are spaced at least 5 minutes apart.

Recording Index Signals

Index signals are recorded in the following cases.

- When a recording is started by pressing REC (REC/OTR).
- When timer recording is activated.
- When REC on the remote controller is pressed during recording.

- When the programme to be viewed is reached, press \triangleright (PLAY).
- Normal playback now commences.

To stop the operation at any time
Press \square (STOP).**Notes:**

- This function may not work properly when recorded programmes run for 15 minutes or less.
- If the timer recording is completed and the video cassette is neither ejected nor replaced with another one, pressing SEARCH does not activate the Intro-Jet Scan function, but the programme list search function instead. (See page 29.)

Searching Timer-Recorded Programmes (Programme List Search)

When timer programmes are recorded by this VCR, the VCR stores the programming details, and the programmes are selected and searched for by the programme list search function.

This function cannot be used for recordings made with normal recording and one-touch recording(OTR).

Preparations

- Confirm that the TV is on and the VCR viewing channel is selected.
- Cancel standby for timer programme recording.

Displaying the PROGRAMME LIST SEARCH Screen

- 1 Press **SEARCH**.

Programme List				
Pos	Name	Date	Start	
1	CBS	29/10/93	17:46	
3	ARD	28/10/93	15:00	

- 2 Select the desired programme.

- 3 Press **SEARCH** once more to start searching for the selected programme. Playback starts when the beginning of the programme is found.

- The details of the timer-recorded programmes on this video cassette are displayed on the PROGRAMME LIST SEARCH screen in the sequence in which the programmes were recorded.

To stop the search at any time

Press **EXIT** or **MENU**.

Notes:

- This function does not work during timer recording standby mode.
- This function works only for video cassettes containing timer-recorded programmes.
- Since this function works only for the currently loaded video cassette, all the programming list details will be cleared when the video cassette is ejected or replaced with another one. In such cases, use the VHS index search system or the Intro-Jet Scan function. (See page 28.)
- The programme list search function may not work properly when recorded programmes run for 15 minutes or less.
- Ensure that **Tape length for Functions** on the **Main menu** is set correctly. Otherwise, this function will not operate correctly.
- When **SEARCH** is pressed during playback, playback is stopped immediately, and the **PROGRAMME LIST SEARCH** screen appears.
- Up to 8 programmes can be displayed on the **PROGRAMME LIST SEARCH** screen. If the timer is used to record more than 9 programmes, the oldest programme will be deleted on the **PROGRAMME LIST SEARCH** screen, and a new timer-recorded programme will be entered and displayed.
- This function may not work properly depending on the tape position when you press **SEARCH**.
- This function may not work properly when for example, you try to record over a programme with another programme that is timer-recorded on the same portion of the tape.

Editing

Assembly Editing

This function can be used to make an edited tape from other recordings or video sources. A new scene can be added to the end of a previous one.

Preparations

- Connect a movie camera or another VCR to this VCR as shown.
- Insert a recorded cassette tape with an intact erasure prevention tab.
- Select the video source by pressing **INPUT SELECT** to set A1 or A2. Be sure that the **VCR/TV** switch is set to **VCR**.
A1: Through the AV1 (TV) socket.
A2: Through the AV2 (DECODER/EXT) socket.

Operations

- 1 Search for the end of the previous recording using **▷ (PLAY)**.
- 2 Press **PAUSE/SLOW**.
- 3 Press **REC (REC/OTR)** to switch the VCR from pause mode to recording standby mode.
- 4 Press **PAUSE/SLOW** again to start the new recording.
- 5 Press **□ (STOP)** to stop recording.

Note:

The new sound will be recorded on both the normal and Hi-Fi sound tracks, only monaural sound recording is possible on the normal sound tracks.

■ Storing TV Stations into your VCR

The VCR is fitted with its own tuner (just like a normal TV set) and can be pre-set to receive up to 99 TV broadcast stations.

If VCR is not correctly tuned by Auto setup, follow the procedure below.

Preparations

- Confirm that the TV is on and the VCR viewing channel is selected.
- Turn on the VCR.

Manual Tuning Procedure

Follow the on screen operation guide.

When deleting stations, adding "blank" positions and changing (moving) the programme position:

These indications do not appear on the screen after performing Preset Download (Download).

- 1 Press MENU and select **Tuning**.

- 2 Select **Manual**.

- 3 Select the desired programme position.

- 4 Follow the steps indicated below.

Indications

- Delete:** Press **▼**(red) to delete the station.
- Add:** Press **—**(green) to add a blank position
- Move:** Press **—**(yellow) to change (move) the programme position.
 - The blue indication represents no function.
 - These indications do not appear after performing Preset Download (Download).

- 5 Press **OK**, and then press **EXIT**.

Changing the Programme Position (Pos)

Follow 1 to 3 in the first procedure.

- 4 Press **OK** and then select **Pos**.
 - Be sure that the VCR/TV switch is set to VCR.

- 5 Press **OK** to confirm.

- 6 Press **MENU**, and then press **EXIT**.

Changing the Channel (Channel)

Follow 1 to 3 in the first procedure.

- 4 Press **OK** and then select **Channel**.
 - Be sure that the VCR/TV switch is set to VCR.

- 5 Press **OK** to confirm.

- 6 Press **MENU**, and then press **EXIT**.

Changing the Station name (Name)

Follow 1 to 2 on page 31.

- 3 Select the station(s) name *□□□□.

Establish which channel you are viewing by checking your TV Guide/Newspaper.

- "□" indicates the position number or station name. This is the same as steps 4 and 5.

- 4 Select **Name**.

Enter characters into all five *□□□□ positions from the table using the arrows and press **OK** after each character. Use a blank space if required. To enter a blank, select the area between Z and *.

- To cancel during entry, press **EXIT**.

The characters that have been entered will remain as the station name. Enter the correct station name as failure to do so may result in malfunctioning.

- 5 Press **MENU**. If any other station names are marked *□□□□, repeat steps 3-5.

- 6 Press **EXIT**.

Fine Tuning

Follow steps 1 to 3 on page 31.

- 4 Press **OK** and then select **Fine Tuning**.

- 5 Press **▲** or **▼** to obtain the best tuning condition.
 - To return the tuning to its former state (**AUTO**), press **►**.

- 6 Press **OK** to confirm.

- 7 Press **MENU**, and then press **EXIT**.

Decoder

Follow steps 1 to 3 on page 31.

- 4 Press **OK** and then select **Decoder ON** or **Decoder OFF**.

ON : To preset pay TV stations.

OFF : To preset normal TV stations.

- 5 Press **OK** to confirm.

- 6 Press **MENU**, and then press **EXIT**.

Changing the Video System (Video system)

Follow steps 1 to 3 on page 31.

- 4 Press **OK** and then select **Video system**.

PAL: For receiving PAL signal.

MESECAM: For receiving SECAM signal.

- 5 Press **OK** to confirm.

- 6 Press **MENU**, and then press **EXIT**.

Changing the Recording Sound (Mono) (NV-HD630EC only)

Follow steps 1 to 3 on page 31.

- 4 Press **OK** and then select **Mono OFF**.

- Select **Mono ON** to record the normal sound during a stereo, bilingual or NICAM broadcast or if the stereo sound is distorted due to inferior reception conditions.

- 5 Press **OK** to confirm.

- 6 Press **MENU**, and then press **EXIT**.

Notes:

- When channels have been set with manual tuning, the channel position will need to be entered the first time ShowView is used.
- When Preset Download (Download) has been executed, do not perform Manual Tuning. This is because when the tuning contents for the TV are changed, this information is downloaded to the VCR again, possibly erasing the independent contents input by Manual Tuning.

Channel Plan

Channel Indication	TV Channel	
Germany/Italy	Other Countries	
2-12	*E2-E12	E2-E12
13-20	A-H (Only Italy)	—
21-69	21-69	21-69
74-78	S01-S05	S1-5
80-82	S1-S3	M1-M3
83-89	S4-S10	M4-M10
90-99	S11-S20	U1-U10
121-141 Hyperband	**S21-S41	S21-S41

*In Italy: H1...(11), H2...(12)

**Only for 8 MHz channel raster

Auto-Setup Restart

When your address changes, follow the procedure below.

- 1 Press MENU and select Tuning.

- 3 Press OK again.

**Note:**

To re-tune the VCR, disconnect and then reconnect the mains lead.

Download

To perform downloading again, follow the procedure below in the stop mode.

- 1 Press MENU and select Tuning.

- 3 Press OK again.

**Shipping Condition**

If you want to return the VCR to the factory-preset condition, follow the procedure below.

- 1 Press MENU and select Tuning.

- 3 Press OK twice.

Note:

To re-tune the VCR, disconnect and then reconnect the mains lead.

Setting the Clock of your VCR

The built-in clock is used to activate the timer for automatic recording and must be set to the correct time.

The built-in digital clock employs the 24-hour system. If VCR is not correctly set by Auto setup, follow the procedure below.

The clock backup system operates for at least 60 minutes in the event of power failure.

2

- Check that the
- Automatic**
- setting is
- OFF**
- , then press
- OK**
- .

- If the setting is **ON** when you open the On Screen Display, do not turn it **OFF**, as then you will not be able to set the time automatically.

**3****Set Time and Date.**

- Press
- ◀**
- to return to the previous item.

**4**

- Press
- OK**
- to confirm.

5

- Press
- EXIT**
- .

Note:When the **Automatic** setting is **OFF** and the **Power save** setting is **ON**, the time may become incorrect. If this happens, reset it following the method described above.**Manual Clock Setting**

Follow the on screen operation guide.

Operations

- 1 Press
- MENU**
- , and then select
- Clock**
- .

**Automatic Clock Setting**When "Automatic" is set to **ON**, the automatic time correcting function is activated every day.

The automatic time correcting function is only activated when the power is off.

When the **Power save** setting is **ON** when the power is off, this function will not work. In this case, set the time automatically immediately after turning on your VCR. This function is not activated during timer recording standby mode.

Settings Using On Screen Display

The VCR indications shown on the TV screen are known as the On Screen Display (OSD).
This VCR allows many settings to be made at the OSD.

Preparations

- Confirm that the TV is on and the VCR viewing channel is selected.
- Turn on the VCR and TV.

Display

Channel Guide

- 1 Press MENU, and then select Display.

On Screen Display

- 2 Select Channel Guide.

- 3 Select ON or OFF.

ON: The Channel Guide will appear for a few seconds each time the channel is changed with ∇ (▼) Δ (▲).

OFF: The Channel Guide will not appear.

- 4 Press EXIT to exit the On Screen Display.

OSD

- 1 Press MENU, and then select Display.

- 2 Select OSD.

- 3 Select ON or OFF.

ON: The On Screen Display will appear on the TV screen.

OFF: The On Screen Display will not appear.

- 4 Press EXIT to exit the On Screen Display.

To use the On Screen Display:

- ① TV station

- ② TV system

- ③ STEREO or BILINGUAL Indicator (NV-HD630/628EG)

When receiving a TV programme, the type of sound system in which it is broadcast is automatically indicated.

STEREO, M1 and M2 Indicator (NV-HD630EC)
When receiving a TV programme with the Stereo, Bilingual or NICAM sound system, the type of sound system in which it is broadcast is automatically indicated.

STEREO: When receiving a Stereo/NICAM stereo broadcast.

M1/M2: When receiving a Bilingual/NICAM dual-sound broadcast.

M1: When receiving a NICAM monaural broadcast.

④ Audio Output Mode Indicators

The Left (L) and Right (R) Indicators show which sound mode is selected with **AUDIO OUT** (see page 7).

Stereo: Both the L and R Indicators appear.

Left: The L Indicator appears.

Right: The R Indicator appears.

Normal: Both the L and R Indicators don't appear.

⑤ Tape speed Indicator

⑥ Tape running display

Stop, Eject	□
Rewind	◀◀
Fast Forward	▶▶
Playback	▶
Recording	●
Repeat Playback	R

⑦ Present time/Tape counter/Remaining tape time/Index Search/One-Touch Recording (OTR)

Present time	17:24:31
Tape counter	-2:35.47
Remaining tape time	REMAIN 2:34
Index Search	▶▶ 02
One-Touch Recording (OTR)	OTR 60

Notes:

- When the item "OSD" is set to **OFF**, the On Screen Display will not appear.
- When the AV position has been selected or during playback, the On Screen Displays (①, ②, ③) do not appear.
- The On Screen Display does not appear during special playback.

Power save

- 1 Press MENU, and then select Display.

ON: This setting conserves power when the VCR is off.

- The VCR display settings are automatically set to OFF.
- To turn on the VCR, keep POWER \diamond /I pressed on the VCR main unit. You cannot turn it on using POWER \diamond on the remote controller.
- The Power save function will work only in the normal standby mode. It will not operate in the Timer standby mode. After recording all programmes and erasing all programmed data, the VCR will go into Power save mode.
- When the Power save setting is ON, the scrambled signal cannot be watched because the decoder cannot be used.

OFF: This setting does not conserve power when the VCR is off.

- 4 Press EXIT to exit the On Screen Display.

VCR display

This setting is activated only when the Power save setting is set to OFF.

- 1 Press MENU, and then select Display.

ON: When VCR is turned off, the characters are lit in the VCR display.

OFF: When VCR is turned off, the characters are not lit in the VCR display.

DIMMED: When VCR is turned off, the characters are dimmed in the VCR display.

- 4 Press EXIT to exit the On Screen Display.

Functions**Tape length**

- 1 Press MENU, and then select Functions.

◀E-180: For E30, -60, -90, -120 and -180 tapes.

E-195: For E195 tape.

E-240: For E240 tape.

E-260: For E260 and -300 tapes.

- The times displayed may differ depending on the tape used.

- 4 Press EXIT to exit the On Screen Display.

To set the Colour TV System (TV system)

- 1 Press MENU, and then select Functions.

- Set according to the colour TV system used during playback or external recording.

- 4 Press EXIT to exit the On Screen Display.

Language

- 1 Press MENU, and then select Language.

**AV2**

- 1 Press MENU, and then select Functions.

EXT: When another VCR is connected to the AV2 (DECODER/EXT) socket.

DECODER: When the decoder is connected to the AV2 (DECODER/EXT) socket.

- 4 Press EXIT to exit the On Screen Display.

Country

- 1 Press MENU, and then select Country.

SECTION 2 ADJUSTMENT PROCEDURES

2-1. DISASSEMBLY METHOD

2-1-1. DISASSEMBLY FLOW CHART

This flow chart indicates disassembly steps of the cabinet parts and the circuit boards in order to find the necessary items for servicing.

When reassembling, perform the steps in the reverse order.

Fig. D1

Insert the Blank Tape.	2 03 00
This adjustment is automatically started.	2 03 00
When this Adjustment is terminated, the following operation will be activated. ● Adjustment completed : The VCR goes to STOP Mode.	
To release Service Mode, press FF and EJECT keys simultaneously 6 times until the normal indication on the FIP.	

Fig. E6

Less than 1.0V	Test2																				
7	I	S-PHOT	This port receives 2.4V when Supply photo sensor detects the tape end.																		
8	I	T-PHOT	This port receives 2.4V when Take-up photo sensor detects the tape beginning.																		
9	I	TRACKING ENVE	Playback envelope input for tracking adjustment.																		
10	I	ABS.NORM(L)	HI-FI audio mode selection.																		
11	O	CURRENT LIMIT	Capstan motor current limitter output.																		
12	O	REC CUR	AI recording current control and Playback AI picture VR control.																		
13	O	ART.V/H/N	This port supplies artificial vertical sync signal to stabilize the picture in special playback mode.																		
14	I	REMOCON	Remote contoroll signal input.																		
15	O	ROTARY.SW	Rotary switching signal output.																		
16	O	H.A.SW	Head amp switching signal output.																		
17	I	ENVE.SLECT	This port receives the playback envelope signal level to select the video head in special playback mode.																		
18	O	VIDEO.H.SW	Video head switching signal output.																		
19	O	AUDIO.H.SW	Audio head switching signal output.																		
20	O	REC(H)	Video/audio signal recording/playback control.																		
21	O	D.REC(H)	Video signal recording on/off control.																		
22	O	C.EMPHA(H)	This port supplies high during a certain time from starting the recording to control the HI-FI audio recording current.																		
23	O	D.FM.REC(H)	HI-FI audio recording on/off control.																		
24	O	VIDEO EE(L)	This port is low during EE mode.																		
25	O	TRICK(L)	This port is low during special playback (CUE,REV,SLOW,STILL) mode.

50	O	HALF WAVE(H)	Capstan driver selection.																																								
51	O	P.OFF(H)	Power on/off control.																																								
52	O	FF/REW(L)	This port supplies low during FF and REW modes.																																								
53	O	PB AI1(H)	AI playback control.																																								
54	O	PB AI2(H)	AI playback control.																																								
55	O	UNLOADING(H)	This port supplies high during the mechanism is unloaded.																																								

Fig. MP2

INPUT/OUTPUT CHART FOR IC6001

Pin No.	In/Out	Port Name	Function
56	O	LOADING(H)	This port supplies high during the mechanism is loaded.
57	O	SP(H)	This port supplies high during SP mode.
58	O	SLEEP(L)	This port supplies low during super power save mode.
59	O	PAL-I/BG/DK	System 4 (Refer to Fig.MP4)
60	O	SECAM/PAL	System 2 (Refer to Fig.MP4)
61	O	NTSC(L)	System 5 (Refer to Fig.MP4)
62	O	PAL/MESECAM	System 1 (Refer to Fig.MP4)
63	I/O	EDITTRIG(L)	Synchronized editing control.
64	I/O	PREROLL(H)	
65	O	5P/T2.DATA.OUT	Edit 5P serial data output.
66	I	5P/T2.DATA.IN	Edit 5P serial data input.
67	O	5P/T2.CLOCK	Edit 5P serial data clock.
68	O	T-BUS/IC.OUT	OSD microprocessor and FIP driver serial data output.
69	I	T-BUS/IC.IN	OSD microprocessor and FIP driver serial data input.
70	O	T-BUS/IC.CLK	OSD microprocessor and FIP driver serial clock output.
71	O	IIC.CLOCK	Tuner and HI-FI audio IC serial clock output.
72	I/O	IIC.DATA	Tuner and HI-FI audio IC serial data input/output.
73	O	125Hz	Oscillator output for main clock adjustment.
74	O	STANDBY(L)	This port supplies low during standby mode.
75	I	POWER FAIL(L)	Power failure detection.
76	O	CAP.R/F	Capstan rotation direction control. Reverse : High Forward : Low
77	O	CAP.ET	Capstan torque control.
78	O	CYL.ET	Cylinder torque control.
79	I	S.REEL.PULSE	Supply reel pulse input.
80	I	T.REEL.PULSE	Take-up reel pulse input.
81	I	STAB(L)	This port receives low while the cassette tape with safety tab is inserted.
82	I	POWER KEY(H)	Power on/off key input.
83	I	SHORT DN	DC voltage (BIAS (H)) detection. When detecting High at BIAS (H) during BIAS (H) is set to except high, compulsory power is turned off (Self test indication display F08). When detecting Low at BIAS (H) during BIAS (H) is set to high, compulsory power is turned off (Self test indication display F07).
84	I	Csync	C sync signal (Built in sync separation circuit) input.
85	I	CAP.FG	Capstan FG input.
86	I	CYL.PFG	Cylinder PFG input.
87	I	SECAM24(H)	Video head selection input.
88	-	GND	GND.
89	O	OREF	Op amp output for 1/2 VDD reference.
90	I	IREF	Op amp input for 1/2 VDD reference.
91	I	CTL.HEAD(-)	Control signal (-) input.
92	I	CTL.HEAD(+)	Control signal (+) input.
93	O	CTL.AMP.SW	Control amp switching output.
94	I	CTL.AMP.IN	Control amp input.
95	I	CTL.AMP.REF	Control amp reference input.
96	-	CTL.AMP.GND	Control amp GND.
97	O	PB.CTL.OUT	Control amp output.
98	-	5V(A)	Analog 5V.
99	-	5V(AD)	5V.
100	I	CH END(H)	This port receives High when detecting audio carrier during tuner preset.

Fig. MP3

	System 1 *1 Pin 62	System 2 Pin 60	System 4 Pin 59	System 5 Pin 61	MONO (H) Pin 2
MODE 1	MESECAM (H) H : MESECAM L : PAL	Low is fixed.	Low is fixed.	NTSC (L) H : 50Hz L : 60Hz	Low is fixed.
MODE 2	MESECAM (H) H : MESECAM L : PAL	Low is fixed.	Low is fixed.	NTSC (L) H : 50Hz L : 60Hz	MONO (H) *3 H : MONO ON L : MONO OFF
MODE 3	Low is fixed.	Low is fixed.	Low is fixed.	NTSC (L) H : 50Hz L : 60Hz	MONO (H) *3 L : NICAM AUTO H : NICAM OFF
MODE 4	MES/AUTO/PAL H : MESECAM Z : AUTO L : PAL	Low is fixed.	I/DK/BG H : I Z : DK L : BG	NTSC (L) H : 50Hz L : 60Hz	MONO (H) *3 H : MONO ON L : MONO OFF
MODE 5	MES/AUTO/PAL H : MESECAM Z : AUTO L : PAL	SEC/AUTO/PAL *2 H : SECAM Z : AUTO L : PAL	L/BG H : L L : BG	NTSC (L) H : 50Hz L : 60Hz	MONO (H) *3 H : MONO ON L : MONO OFF

Z : High impedance

*1 : High impedance is set during NTSC playback mode. High is set compulsory during full screen display except NV-HD680 series.

(System 1 is set to high and system 5 is set to low during full screen and NTSC playback)

*2 : Low is set during NTSC playback.

*3 : It follows OSD.

② CASING PARTS SECTION

Note: 1. * Be sure to make your orders of replacement parts according to this list.

2. **IMPORTANT SAFETY NOTICE**

Components identified with the mark Δ have the special characteristics for safety. When replacing any of these components, use only the same type.

4-2. ELECTRICAL REPLACEMENT PARTS LIST

Note: 1. Be sure to make your orders of replacement parts according to this list.
 2. IMPORTANT SAFETY NOTICE : Components identified with the mark Δ have the special characteristics for safety. When replacing any of these components, use only the same type.
 3. Unless otherwise specified,
 All resistors are in OHMS, K=1,000 OHMS. All capacitors are in MICROFARADS(uf), P=uuf.
 4. The P.C. Board units marked with "■" show below the main assembled parts.
 5. The marking (RTL) indicates the retention time is limited for this item.
 After the discontinuation of this assembly in production, it will no longer be available.
